EZ SERIES® SIMPLEX

Single Phase Simplex Control Panel

Function

The **EZ Series® Single Phase Simplex** panel is designed to control one 120/208/240V single phase pump in water and sewage installations. It features a **digital display** on the inside of the front cover for programming pump control and system monitoring, including: float status, elapsed time pump run, cycle counter, alarm counts (high water/power fail), float error count, auxiliary alarm counter, timer override count (TD only), on/off time (TD only). This innovative control panel is **easily converted** to demand or timed dose **in the field**.

Options

- DUO alarms for local code compliance
- Optional mounting post with removable access door
- Duplex model available
